

# Town Meeting Stats

The graph shows the number of articles, attendees, and the average number of minutes spent discussing articles at both spring and fall Town Meetings over the past 10 years. High attendance in 2018 was due to the vote on the new elementary school. Attendance at fall meetings in 2019 and 2021 exceeded spring attendance due to topics of broad interest, including banning deer hunting and buying the new Council on Aging building.

Note: Spring Town Meeting in 2016 and 2017 took place over two nights. Attendance numbers in the graph are for the first night; second night numbers dropped by about 100 people both years.
